

Anyone who has ever had satellite radio knows that it is more informative and more entertaining than standard commercial radio. The selection is broader and more informative. there are channels for kids, and channels for adults. there is news, traffic, sports, weather, and a broad selection of international channles, such as CNN in Spanish and BBC. these are things that we could never and would never get on commercial FM radio.To deny people the opportunity to remain more informed and more entertained is a sad commentary on American freedoms.
